

## RADIO TELEMETRY AS A RESEARCH TOOL

On the map, mark the location of the rabbit each time you play the simulation.

Draw a circle around the area you think the rabbit uses as a home range.

Then, using the information you have gathered, answer the questions below.

### QUESTIONS:

Are there any patterns to the rabbit's locations?

Where do you think the rabbit's nest might be located?

Is there anything else that you can conclude from your observations?
