Portal from A to Z	Bill Childers	University of Illinois	Sunday, 1:30-2:30	<p>Portals are the new buzz word for the internet. How do you choose one, who participates with you in it, and how can you get it off the paper and you staff into it. Come listen to 3 states experiences in making choices on platforms, working with external partners, and implementation and see what a portal could mean for you.</p>	wchilder@uiuc.edu
CSS	Bill Shepler	Purdue University	Sunday, 1:30-2:30	<p>Cascading Style Sheets (CSS) have been used for some time in the formatting of text on the internet, but is this the real intent of this technology? This panel will discuss the advantages and capabilities of CSS in the www, and examine some of the uses of this technology in education.</p>	shepler@purdue.edu
Diaster Recovery	Bonnie Scranton	The Ohio State University	Sunday, 2:45-3:45	<p>This panel on disaster recovery is presented in two parts with open discussion at the end. The first presentation looks at disaster recovery planning at a high level and addresses specific issues related to the successful creation and maintenance of useful network documentation. The second is about the planning, testing, and updating a disaster recovery plan, including the formation of a disaster recovery team, the conducting of an impact analysis, and the identification of critical functions.</p>	bscranton@ag.osu.edu

Video Conferencing	Pete Vergot III	University of Florida IFAS Extension	Sunday, 2:45-3:45	Discussions centered on topics related to: Extension faced with reduced budgets and increase in demand for services from Extension clientele turned to the use of web based interactive video for many types of day to day communications, professional development for county faculty and enhancing daily operations. The purpose of using web based interactive video use was to reduce the amount of travel time for Extension administrators and faculty and to allow increased participation during workshops, conferences and program planning.
